

# GreenLIFE

## ENDO™

LIQUID BIOLOGICAL AMENDMENT

Specially formulated to encourage soil and plant health in all major commodity crops, vegetables and grasses. Exclusive and patented product blends

Microbes  
BioSciences  
is a leader in  
biotechnology  
research,  
development  
and innovation

**GreenLIFE ENDO™** is an ecofriendly liquid microbial amendment that combines beneficial *Bacillus* bacteria and mycorrhizal fungi

# GreenLIFE ENDO™

## Applications

Agriculture -

Commodities, Vegetables, Trees,  
Nuts, Turf

Hydroponics

Horticulture

Seed Treatments

Arbory & Landscape

Forestry

Erosion Control & Restoration

Superior Nutrient Cycling

Mycorrhizal Fungi

Healthy Bacteria

LIQUID BIOLOGICAL AMENDMENT

See for yourself how

GreenLIFE ENDO™ gets  
results!

GreenLIFE ENDO™ Control

Stronger Roots

- Promotes growth of healthier plants
- Increases crop yield and quality
- Utilizes the synergistic effects of a consortium of plant growth-promoting beneficial bacteria
- Solubilizes nutrients in organic form, increasing plant availability and uptake
- Promotes soil health
- Organic Materials Review Institute (OMRI®) listed
- Allows reduced reliance on other agricultural inputs, such as chemical fertilizers
- Restores beneficial soil microorganisms following herbicide or fungicide use
- Environmentally sound: non-toxic and no harmful runoff
- Provides essential components of sustainable and regenerative farming
- Mobilizes soil minerals otherwise unavailable to plant roots
- Enables uptake of nutrients from outside the plant rhizosphere
